DATE MAILED: 12/16/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

**Office Action Summary**

Application No.

09/719,454

Applicant(s)

KUCHIISHI ET AL.

Examiner

Jack Chiang

Art Unit

2642

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 07 September 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☐ Claim(s) 1,2,4,6-10,13 and 14 is/are pending in the application.
- 4a) Of the above claim(s) 7 is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1,2,4,6,8-10,13 and 14 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## **CLAIMS**

### **Objection**

1. Claims 9-10 and 13-14 are objected to under 37 CFR 1.75, because all these claims are depending from a withdrew claim 7.

**(NOTE:** the following rejection is made based on the assumption that these claims are depending from claim 8).

### **Art Rejection**

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 4 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Nevo et al. (US 5371790).

Regarding claim 4, Nevo shows a portable telephone unit (10) comprising:

Soft material (20-26) that protrudes more than hard material (32, 52) formed on surfaces of upper and lower cases formed of the hard material, a portion of a surface

Art Unit: 2642

(see side walls adjacent to keypad) of the soft material is corrugated to facilitate shock absorption (col. 2, lines 20-24, col.3, lines 47-50, col. 4, lines 1-9).

Regarding claim 6, Otake shows:

The soft material (20-26) which covers a grip portion of upper and lower cases (32, 52).

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-2, 8-10, 13-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Otake (JP 6-268548) in view of Bent et al. (US 5613237).

Regarding claim 1, Otake shows a portable telephone unit (10) comprising:

A waterproof rib (55 or 11) formed of a soft material integrally provided on the periphery of a joint surface of one of the upper and lower cases (12) formed of hard material,

The waterproof rib (55 or 11) is fitted into a waterproof groove (56 or 54), thereby to join the upper and lower cases water-tightly to each other.

Otake differs from the claimed invention in that the waterproof rib appears to be a half sphere shape instead of a quarter sphere shape.

However, Bent teaches providing a waterproof rib having a quarter sphere shape (102, 103).

Art Unit: 2642

Hence, the concept of providing a waterproof rib is well taught by both Otake and Bent. It would have been obvious for one of ordinary skill in the art to use Otake as it is, or to modify Otake's half-sphere-shape waterproof rib with a quarter sphere shape as taught by Bent, as long as the basic concept of latching the upper and lower cases together is substantially unchanged (Figs. 1 and 7 in Otake; col. 1, lines 36-37 in Bent).

Regarding claim 8, Otake shows a portable telephone unit (10) comprising:

An upper case (12);

A lower case (22);

A waterproof rib (55) formed of soft material located on a periphery of one of the cases;

A waterproof groove (56) formed of the shock absorbing soft material located on a periphery of the other of the cases;

The waterproof rib and the waterproof groove (55, 56) are coupled together to facilitate a waterproof coupling between the cases (12, 22).

Otake differs from the claimed invention in that it does not explicitly show a portion of a surface of the soft material is corrugated.

However, Bent teaches providing a shock absorbing soft material having a portion which is corrugated (see 100).

Hence, it would have been obvious for one of ordinary skill in the art to modify Otake's soft material with a corrugated portion as taught by Bent, such that to improve the gripping of the device, and to provide a device that is simple and easy to assemble (col. 1, lines 30-32 in Bent).

Regarding claims 2, 9-10, 13-14, the combination of Otake and Bent shows:

The waterproof groove (56 in Otake);

The fan-shaped waterproof rib (55);

The soft material (11, 21) which covers a grip portion of upper and lower cases (12, 22);

The upper and lower cases (phone cases 12, 22) are formed of a hard resin material;

The rib and the groove (55, 56) is formed integrally with the cases (12, 22, see figs 5 and 7).

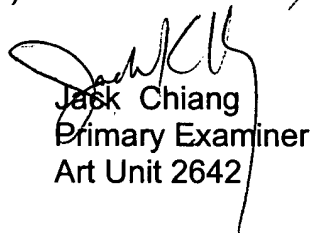

### **ARGUMENT**

6. In response to the remarks filed on 09-07-04, applicant mainly argues about the claimed "quarter sphere shape" and the "corrugated portion". These issues have been addressed in the rejections above, see comments above.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack Chiang whose telephone number is 703-305-4728. The examiner can normally be reached on Mon.-Fri. from 8:00 to 6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ahmad Matar, can be reached on 703-305-4731. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
